

## **Illicit Discharge Detection and Elimination (IDDE) Program**

Empire Township does not allow ANYTHING except rain water into the storm drainage system. The goal of the Township's IDDE Program is to keep pollutants from entering our waterways. This is achieved through source tracing, detection of illicit connections, and spill reports made by citizens.

Call **651-470-5056** during business hours if you see something entering a storm drain or a stream channel that looks like it shouldn't be there, or 651-463-4494 after hours.

If you suspect the substance is a hazardous material, **call 911 first.**
